

Problem 3.20

Given $i_5 = 0.1$ and $I_5 = 14.641$. Find $A(4)$.

Solution

We are given

$$I_5 = 14.641.$$

Recall that

$$i_5 = \frac{I_n}{A(n-1)}.$$

Therefore,

$$i_5 = \frac{I_5}{A(4)}.$$

Substituting the given values,

$$0.1 = \frac{14.641}{A(4)}.$$

Solving for $A(4)$,

$$A(4) = \frac{14.641}{0.1} = 146.41.$$
